

Suppose We (The Flying Crooked Series Book 1) by Geoff Nelder

When a ship crash-lands on a faraway planet the crew needs local help. Unfortunately, the natives are a million years ahead of us. Ignored, the crew has to find a way to get attention.

Bringing back a sense of discovery and wonder to science fiction.

Reviews:

“I’ve always found Geoff’s work both inspirational and brilliant. I know that whenever I pick up one of his works I’m in for a damned good read. For those who’ve never read any of his works before, welcome to the Geoff Nelder club.” By Mark Iles, author of The Darkening Stars series.

“Geoff Nelder inhabits science fiction just as other people inhabit their clothes.” By Jon Courtenay Grimwood: Felaheen, Pashazade and End Of The World Blues.

If you liked Tuf Voyaging by George R.R. Martin, and Anne MccAffrey’s Dinosaur Planet you’ll like SUPPOSE WE.

Incremental: 25 Tales Of Fantasy, Sci-Fi, Speculative, and Bizarre Fiction by Geoff Nelder

These twenty-five tales from Geoff Nelder have increment as a theme. INCREMENT:

Noun – an increase or addition, especially one of a series on a fixed scale. Synonyms: increase, addition, gain, augmentation, step up, supplement, addendum, adjunct, accretion, boost, enhancement. Verb – cause a discrete increase in. Mathematically the difference can be negative – decremental.

For example, a pothole doubles in size every day, a meteorite hits the same house daily at the same time, or a heavy leather-bound book on the top shelf teeters closer to toppling at each library visit. A sound is heard all over the Earth, but more worrying, it gets louder each day. A couple of astronauts' crash land on an ocean planet (apparently) and incrementally sink.

A few stories are more mental than incremental, you'll see.

Some of the stories have won awards and have been published before, but most of the wordage is new and drawn together for a common theme. I do not apologize for the mix of genres in this collection. I write as the muse takes me and only afterwards am, I asked, is it hard SF, bizarre, horror? You have a smorgasbord of fantasy, science fiction and speculative in your hands.

Reviews:

"Some of these stories are more mental than incremental - all wonderful." By Limnisa Writers' Retreat, Greece.

'A feast of Kafka-esque incremental tales, to be 'literally' devoured one after the other...' by Mark Iles author of the Pride of Lions #1 best-selling sci fi book.

Xaghra's Revenge by Geoff Nelder

When Reece and Zita become lovers, past and present collide as the spirits of their ancestors force them to relive one of the greatest battles of the 16th century. Xaghra's Revenge follows the fate of a sixteenth century abducted family, and of two contemporary lovers thrown together by the ancients. Reece and Zita are unaware that one descends from the pirates, the other from the abducted family. While ancient Gozo spirits seek revenge, so do the Ottoman Corsairs, who intend to roll back history, and this time win the siege of Malta.

The history is real. The places are authentic. The tension and excitement are palpable. "A gripping tale, full of energy and mystery, keeping you wanting for more with every line you read." John Bonello, First-Prize Winner of the Malta National Book Award "I liked it. There's a foreground of interesting characters combined with a skillfully fed-in hint of weirdness." Jaine Fenn – Hidden Empire series.

ARIA Trilogy

ARIA: Left Luggage (ARIA Trilogy Book 1) by Geoff Nelder

Winner - 2012 P&E Best Science Fiction and Fantasy Novel

This is where The Andromeda Strain meets Memento...

When an alien suitcase is found in space, a pandemic virus plagues Earth. Ryder Nape must gather survivors to escape an apocalyptic extinction of the human race.

ARIA: Alien Retrograde Infectious Amnesia

Today, Jack caught a bug at work. He catches a bus home. By the time he disembarks, all the other passengers and the driver have fuzzy heads. Jack has caught an amnesia plague, and it's infectious. No cure.

Imagine the ramifications:

The passengers arrive home, infecting family; some shop en route gifting everyone they meet with the disease. The bus driver receives more passengers giving them change for last week's prices and today's amnesia. Some passengers work at the power plant, the water treatment works, the hospital, fire station. Dystopian chaos in weeks.

One man, Ryder Nape, knew about the case found in space and realizes it's been opened, but can he persuade friends to barricade themselves in a secluded valley, hiding from the released amnesia bug? The survivors find love, hope and thoughts of revenge in their heroic struggle against the apocalypse.

ARIA: Left Luggage is a well-written novel with the pace and suspense of a video game (BioShock immediately comes to mind). The balance between character development and plot progression is managed smoothly, along with the thematics, which take the reader through a series of all-too-believable scenarios, chillingly showing how easy it would be for an advanced group of aliens to undermine the human race and have us destroy one another, without the need for any additional weapons or warfare. By Magdalena Ball

"Geoff Nelder inhabits Science Fiction the way other people inhabit their clothes." By Jon Courtenay Grimwood

“Geoff Nelder's ARIA has the right stuff. He makes us ask the most important question in science fiction--the one about the true limits of personal responsibility.” By Brad Linaweaver

Robert J. Sawyer calls ARIA a “fascinating project.”

“ARIA has an intriguing premise, and is written in a very accessible style.” By Mike Resnick

5 Star Review: Let me answer the first question that came to my mind when the book ‘ARIA: Left Luggage’ arrived. The word ARIA has its roots in Italian meaning air.

Science Fiction as a genre literally is in a world of its own because human beings are obsessed with how to destroy or alter all of humanity by a single threat. It is rare that we find an author who can approach this kind of fiction from a new perspective, but Geoff Nelder has a truly unique concept.

As the first chapter begins the reader is introduced to Nelder’s large cast of characters like Vlad, Jena, Dan, Abdul and Antonio. His quantity of characters almost overwhelms the reader at first, but each has a role to play in this ordeal. The variety of solid, believable interpersonal relationships like the between Ryder Nape and his fiancée Teresa are essential as the world is threatened with massive memory loss by an alien virus. ARIA begs the intriguing question that as people lose their memories what is so important to their lives they must make a note of it to read when they wake up each morning?

The year is 2015 and there is never a dull moment as the reader joins the crew of “the shuttle, Marimar, in orbit approaching the International Space Station” and follows the science at the Dryden Space Laboratories at Edwards Air Force Base in California and the NASA Goddard Labs in Maryland. Travels to London and to the Anafon Valley in North Wales. Follow the viral repercussions to the Chester Zoo in UK, Moraine Lake in the Canadian Rocky Mountains and to Banff National Park in Canada.

The author caused this reader to ask how the world would handle such a virus if brought back to Earth from an exploratory mission, who on earth might be immune, and what secrets could NASA and WHO be keeping from us? That is what good science fiction does. It captures the readers’ imagination and takes us to places that we believe are impossible, but somewhere in the dark corners of our minds we recognize that there is a slim probability.

ARIA: Left Luggage by Geoff Nelder (volume one in the ARIA series) is a science fiction, action filled fiction that has already won the coveted Preditors & Editors Readers Poll for best science Fiction novel of 2012. Please consider purchasing and reading the whole ARIA series (available at Amazon). Review by Theodocia McLean.

ARIA: Returning Left Luggage (ARIA Trilogy Book 2) by Geoff Nelder

They wiped out most of Humanity in a split second of universal time.

It's the apocalypse. It's the extinction of mankind.

The Andromeda Strain meets Memento...

Meet the aliens who came from some deep space universe and brought a pandemic of infectious amnesia to Earth with their "left luggage." In this gripping ARIA sequel, Returning Left Luggage, the alien invaders ignore the remaining human survivors or enslave them. Will the disparate last survivors form an alliance? The aliens, however, don't bargain on encountering the psychotic Dr Antonio Menzies, and when he discovers how to use their telepathic-controlled gadgets, odd things happen.

Meanwhile, Ryder Nape - a survivor who escaped the infection - and his isolation group is in the South Pacific facing an invasion of amnesiacs. In France, a bunch of uninfected students discover the truth behind the aliens and their spreading, unkillable bindweed. The survivors' passion for survival and dystopian experience drive them towards revenge, but can they win against such a strange foe? Can they make a first strike count? The destiny of the human race may be in their hands.

ARIA: Alien Retrograde Infectious Amnesia

ARIA: Abandoned Luggage (ARIA Trilogy Book 3) by Geoff Nelder

In 2015, a case found in the struts of the International Space Station is brought to Earth. It releases a virus giving people amnesia. They lose their memory at the rate of a year's worth every week. No one is immune. Infectious amnesia is unheard of. Industry breaks down as people forget where they work and how to perform their duties. People die as they forget their medication, and production ceases along with food, water supply, and energy. A few small groups realise what is happening in time and find isolated refuges. Ryder Nape takes a group to a secluded Welsh valley where safety from the virus is possible. Biologists call the virus ARIA: Alien Retrograde Infectious Amnesia.

In this conclusion to the trilogy, Dr. Antonio Menzies arrives on Zadok. The ARIA-3 bomb had reached there two days previously, causing havoc. Surviving Zadokians consider a mass-migration to Earth to escape the effects of ARIA-3. Antonio's madness grows, and he makes disturbing discoveries in their laboratories.

Meanwhile, Ryder's group is now on a Pacific island. His relationship with Jena is unstable and others have coruscating infatuations in tune with the increasingly desperate situation. When their island becomes unsustainable, and the alien-Earth hybrid weed gets out of control, where should they go?

What was the Zadokians' real purpose with the ARIA viruses, and how does it all end?

“ARIA mingles the most optimistic calculations from the Drake Equation with a distopian outcome, creating a read that is as intriguing as it is fun.” By Magdalena Ball, owner of Compulsive Reader

“If you like your scifi offbeat, original, and backed by science, you're going to love ARIA.” By Kenyon Charboneaux, editor and writing tutor at Eros & Rust

“ARIA: a smart, entertaining gem.” By Dr. Ira Nayman, author of the Transdimensional Authority Series

Hot Air by Geoff Nelder

Erica is a nine-to-five office temp with flaming red hair, emerald eyes, and black lipstick. The highlights of her day usually include coffee meetings and intoxicated fumbings. An adventurer at heart, she hires a hot-air balloon ride for she and her boyfriend, complete with a champagne lunch.

While in the air, she witnesses an unsavory crime happening on the ground below. The perpetrators spot the balloon, and begin shooting at it, hitting the pilot and killing him. Somehow, Erica and Paul manage to land the balloon but their troubles are not over. They are tracked down and abducted by a gang engaged in human trafficking, and taken to an island in the Mediterranean. Erica soon adapts to gangland ways and uses her charms to escape. Along the way, her life shifts from bored office temp to a feisty Lara Croft now living on adrenaline and dangerous men. She is chased by a rogue named Dean, who is annoyed by Erica but falling for her at the same time.

Hot Air is a contemporary crime novel and a winner of both the Wuacademia Silver Award in 2007 and Prix d'Or (Gold) 2008 for best unpublished novel.

Escaping Reality by Geoff Nelder

Escaping Reality is a humorous thriller set in Northern Britain and Amsterdam. The story opens with musician Gerry Ricketts having his face pushed into a water-filled gutter by a large policewoman. He is under arrest. After a quick trial, Ricketts is sentenced to ten years in Stonelodge Prison for a jewel robbery he did not commit.

Determined to discover who framed him, Ricketts begins plotting his escape. It won't be easy. Stonelodge is a Category B prison, old and smelly, with heavy security. His luck finally turns when he enters into a sexual relationship with Wendy, the prison librarian. He finally makes his escape, hiding out in the Northumberland moors, and eventually reaches Amsterdam. But the plot that landed him in prison is bigger than he knows, and his troubles are just beginning as he struggles to stay one step ahead of the law and clear his name.

Escaping Reality, although set in Europe, was inspired by the 1960's TV series The Fugitive. Geoff Nelder's other books include Exit - Pursued by a Bee, ARIA, and Hot Air.
