

The Settlers: An Axe of Iron Novel by J. A. Hunsinger

First Book In An Axe Of Iron Series.

The Settlers: Axe of Iron is a tale of survival, strife, love, and the quest for a new home in the face of hostile opposition. Conditions of manifest destiny propel a large contingent of Norse Greenlanders from relative security into an odyssey of exploration and settlement out over the unknown waters of the North Atlantic, to a North America of one thousand years ago, to a land they called Vinland. The chieftain, Halfdan Ingolfsson and his second-in-command, Gudbjartur Einarsson, spend a winter gathering 315 men, women, and children from the two Norse settlements on the southwestern coast of Greenland.

Early in the spring of A.D. 1008, the company sets sail aboard six large cargo ships. Five days into the voyage, in the strait between Helluland and Markland, present day Hudson Strait, a gale holds the flotilla in its grip for four long and arduous days. Halfdan decides to seek shelter in a protected bay, so they can rest, repair the storm damage, and replenish food stores lost in the storm.

During the following weeks, the settlers reap a harvest of fish and game that is the best in living memory. When hunters discover a sheltered fjord, Halfdan orders a move. Tornit hunters from far to the north venture south to hunt, and the Northmen strike up a friendship with them. The Tornit tell the newcomers much about the local area and describe coastal waters far to the south.

It is this thought-provoking insight into the geography of this new land and the dawning realization that the storm god, Njord, seems to have led his people to this place, that cause Halfdan to revise his thinking and propose a new plan to Gudbjartur and the council of ship's captains: sail south before choosing where to build their settlement.

5 Stars: The Viking ship called 'Steed of the Sea' sailing in the cold dark waters in the foreground of tall glaciers under a foreboding sky on the cover is just the beginning.

Whether you sat under the history lessons of Columbus discovering America or are more adventurous in your approach to history and have a yearning to know who was here when Columbus arrived and where did they come from, 'The Settlers' is a tale that should be on a mandatory reading list in all schools in order to provoke thought and discussion on native North America in the latter half of the tenth century. Scholars can't agree but this tale offers a new perspective about America's indigenous people, how they viewed explorers, handled settlers and coexisted on a bountiful body of land with all its beauty and treacherous environment.

It is important to read the 'Author's Note', 'Historical Perspective' and the 'Glossary Of Norse Terms' provided by the author to educate the reader. In the Author's Note you will meet Gudbjartur Einarsson who is an Icelander, a Northman or Norseman who is second in command under Halfdan Ingolfsson. Chapter one unfolds six wooden ships carrying 163 Greenlanders and 152 Icelanders (including men, women and children) set sail with horses, cows, pigs, chickens, dogs, cats, equipment (tents and parts to horse drawn carts) and supplies to explore areas of what they call Vinland (North America).

Exhaustive research, realistic characters garbed in functional layers residing in a true to life story line that allows the reader to experience the sea voyage and land exploration with exquisite writing that creates a sense of being present in the story even when this first book in 'An Axe Of Iron Novel' series has been closed on a night stand.

Here's a few of my favorite quotes from the book:

... "He whistled tunelessly to himself; the notes blown away on the wind. His eyes darted over the sea ahead and aloft at the trim of the sail and rigging. The heart of the ship pulsed through the soles of his feet, vibrated up through the steering oar and the palms of his hands, an inaudible hum that told him all was well in his world."

... "Wind driven rain stung exposed skin like bees protecting their hive."

... “Several kettles of whale blubber boiled over individual fires on the beach to render the valuable oil. The thick, rich oil skimmed of the connective tissue – the crunchy fried meat and curled pieces of skin were a delicacy-had many uses. It was a valuable food source, preservative, and lamp fuel.”

...After the journey across treacherous seas land was a welcome sight with all of its wild game like “Grunting herds of Reindeer” not to mention the predators like wolves and bears.

...Women and children scour rocky cliffs for seabird eggs to add to their food supply giving the kids some stress relieving egg throwing activity.

...Unforeseen and inevitable injuries, herbal treatments, Viking burial ceremony amidst deep held Christian beliefs.

...Attraction and a “bed of soft, furry skins nestled in the scrub brush, well protected from the north wind”. Passion, “eyes smoldered with lust” hands explore, tongues probe, “locked bodies swayed in the throes of passion”.

...Hunting and cooking for survival, sewing for protective covering, animal pelts and jewelry making for trade commodity. The best and the worst of human nature revealed in a hostile new world.

...Now heading into the reading of ‘Confrontation: An Axe Of Iron Novel’ book two of the series gives clarity as to the sequence of history, characters and events that readers should follow in order to understand and digest the fiction history which is laid out in great detail, humanity and historical correlation regarding much debated events.

The Settlers – An Axe of Iron Novel book one is the fictional historical accounting of exploration and settlement of Vinland (North America).

Editorial Review (Book Marketing Global Network).

From The Author: The Settlers, An Axe of Iron Novel follows Halfdan Ingolfsson, Gudbjartur Einarsson, and their band in their quest for a new home on the coast of North America. In spite of plentiful game, fish, and other natural resources, life is brutally hard. The settlers struggle to establish Halfdansfjord, a haven where they can raise their families.

Building longhouses, harvesting the bounty of land and sea, and preserving the abundance for the long winter ahead leave little time for fun, but the Northmen celebrate their accomplishments with feasting and flirting. Life seems good, if not easy.

But can the Northmen survive skirmishes with the Naskapi and Haudeno? Will friendly relations with the Thalmiut last? And what of the conflicts among the settlers themselves?

From The Back Cover: Half a millennium before Columbus sailed, Northmen had established settlements on the coast of North America. Then they vanished into the mists of time. What happened to them?

The Settlers, An Axe of Iron Novel-- begins the tale of Halfdan Ingolfsson and his band of settlers who struggle to carve a new home from a strange land that challenges them with grueling work and domestic

differences. But day-to-day problems pale compared to hostile native tribes intent on wiping out the intruders.

Review by John Ulbinsky: 5.0 out of 5 Stars. Hunsinger sings a legendary saga! Reviewed in the United States on May 5, 2009. Verified Purchase. A full millennium before the current time and half that period before Columbus sailed for North America, Norsemen had established settlements on that continent, then vanished. "Axe of Iron; The Settlers," by J.A. Hunsinger, is the first of six historical novels that tell the story of one such band that ventured forth from Greenland and settled in the southern regions of what is now Hudson Bay in Canada.

This band has left the Norse settlements of Iceland and Greenland because the climate and soil of those lands were far too harsh and marginal to support their burgeoning population, as were those of their homelands in Scandinavia. Their quest initially follows the paths of the well-known Tenth Century explorers, Eric the Red and Leif Ericsson, but bad weather forces them to alter their course into previously unexplored lands. Their exploration leads them to what appears to be a nearly ideal location on the coast of modern-day James Bay and they settle into the grueling work to establish their settlement and to prepare for the harsh winter ahead.

Knowing fully well those earlier expeditions had suffered from conflicts with the native tribes of the coastal regions, the leader of this band determines that they might better succeed by establishing respectful and cooperative trading relationships with these natives than to attempt naked conquest. Conflict inevitably arises and the settlers must maintain constant vigilance against attack. Domestic matters make things even worse due to a need for more marriageable women in what is mostly a male warrior band.

Will this colony endure its birth pangs and survive to grow and prosper? Can these pioneers adapt to the hardships of their new life?

Author Hunsinger weaves his story line into a magnificently researched and crafted literary work that takes us into the lives of these Medieval Norse, whose culture has brought them to the leading edge of Iron Age Technology. His writing paints the details of their skills as sailors and watermen, farmers and trades people. A prime example of their ability to convert raw materials into essential products is their blacksmithing. Using bog iron from the muskeg swamps and charcoal from the forests, they are able to manufacture steel for weapons, armor and tools. This technological advantage along with their warrior skills might balance the numerical inferiority they suffer against the native peoples.

The saga of these Norse lasts for over four hundred years and ends in the mystery of their disappearance. Throughout "The Settlers," Hunsinger strives in historical fiction to document their struggle for survival. In doing so, he draws striking parallels with our present world. It is obvious that the volume of detailed

onsite research Mr. Hunsinger has invested in this project far outweighs that of this volume and of those to follow.

I have been personally interested in the factual and legendary tale of the Norse in America for many years and I believe this author may be the first to do it justice. This first volume has hooked me on this series and I eagerly await the continuation.

Review by jleepaez: 5.0 out of 5 Stars. A great book to learn about the first European visitors to America. Reviewed in the United States on December 1, 2014. Verified Purchase. This is another fascinating book about the adventures and lives of the Vikings who traveled into North America based on the archeological evidence found in Newfoundland and around Hudson and James bay fully 500 years before Columbus sailed to the Caribbean. Hunsinger is exacting in describing the activities of daily life' sailing, war, and of the people they met on this voyage.

Review by jens karl holm: 5.0 out of 5 stars. I was delighted to find out about this new series. Reviewed in Canada on August 23, 2014. Verified Purchase. I was delighted to find out about this new series. It is a topic of great interest to me - the Norse immigration and attempted settlements in Iceland, Greenland and eastern North America. New archaeological research has been done recently and this author incorporates new research and speculation of contact with aboriginal peoples.

Confrontation: An Axe of Iron Novel by J.A. Hunsinger

Second Book In An Axe of Iron Series.

In *Confrontation*, two calamitous events occur that pave the way for the hostile beginnings of an assimilation process between the Greenland Norse settlers and the natives of Vinland. The first mixing of cultures occurs when a woman of the Northmen, Thora, and Deskaheh the Haudenosaunee, marry. This union, accepted enthusiastically by the Northmen, opens a window into the native mind.

For all the people of this land the way is rocky and fraught with danger at every turn, but the acceptance and friendship that develops between the Northmen and the Naskapi, another native tribe, over an affair of honor, the eventual acceptance of a young boy of the Northmen by his Haudenosaunee captors, and a scenario that seems ordained by the will of the gods, makes it all begin to fall into place, as it must for the Northmen to survive.

Will this developing relationship allow the Northmen to remain in the homeland of the Naskapi, or are they doomed to failure?

The settlers must deal with that question on a daily basis. Standing in their way are uncounted numbers of indigenous peoples, the pre-historical ancestors of the contemporary Cree (Naskapi), Ojibwa

(Anishinabeg), and Iroquois (Haudenosaunee) Indians. From the outset, the warriors of these various tribes violently resisted the incursion of the tall, pale-skinned invaders. The overwhelming numbers of the native peoples in Vinland hold the fate of the Northmen in their hands. The success or failure of the settlement at Halfdansson's fjord hangs in the balance.

5 Stars: This character driven, action packed historical fiction saga continues from 'The Settlers: An Axe Of Iron Novel' where 163 Greenlanders and 152 Icelanders (including men, women and children) set sail with horses, cows, pigs, chickens, dogs, cats, equipment (tents and parts to horse drawn carts) and supplies to explore areas of what they call Vinland (North America).

Confrontation – An Axe Of Iron Novel cover with the Viking battle axe reflecting warriors gives us the first clue regarding the brutal facts of survival and desperate measures taken by men to protect their women, children and settlement with blood sweat and tears. Author J. A. Hunsinger has provided an in-depth 'Glossary of Norse Terms' and 'Native Terms' to help readers understand the people and culture.

Settling into a new land will prove challenging when the indigenous tribes who have a distaste for any fair skinned men due to those who cheated them in trade, abused them and killed their tribesmen in the past. Apart from expected interaction with the variety of native cultures, life in the new settlement is forced into daily and seasonal routines out of necessity.

Halfdan Ingolfsson and Gudbjartur Einarsson (his second in command) walk the settlement commons overseeing the duties pertaining to survival like the grueling process of filling the Kiln (furnace) with dry birch wood, burning the wood until only charcoal is left and then storing this precious commodity under the shed roof to be used for heat and cooking during the harsh winter months.

Children in the settlement (especially the boys) had to earn their place in their family and settlement by moving from boyhood into manhood by demonstrating skills taught and mirrored to them by their fathers, brothers, cousins, and other men around them. Skills like hunting which was the core of survival. Unfortunately, dangers exist when dealing with wild animals like a Bull Moose protecting his territory, cow and calf. Death can be mercifully quick and brutal. The burial ceremony, reverence for even the youngest hunter/warrior, tradition, and spirituality (Gods Will) play a role for the dead and those who remain.

Seasons marked by the moon predict work, trade, play, marriage, and birth. I quote Bjorn "as a pleasant smile curved his lips". "Yes, it is time I thought of a mate. Another long winter comes and company in my bed would be welcome. Perhaps this is the one (as he recalls the tall blonde woman)".

Confrontation is inevitable, warriors' attack, prisoners taken, injuries sustained, spoils of battles and questions about their ability to live in peace brings us to the anticipation of the third book in An Axe Of Iron Series titled "Assimilation".

J. A. Hunsinger's series 'An Axe Of Iron' has been exhaustively researched and parallel the actual events as close as a historical fiction can. I recommend this series to both men and women and suggest that the series be placed on a high school/college reading list.

This reviewer is looking forward to 'Assimilation – An Axe Of Iron Novel' which is the third book in the series.

Confrontation: An Axe of Iron Novel by J.A. Hunsinger's book two is the fictional historical accounting of exploration and settlement of Vinland (North America).

Editorial Review (Book Marketing Global Network).

Review by Kindle Customer: 5.0 out of 5 Stars. Vings and Indians made Cowboys and Indians kids games.

Reviewed in the United States on April 27, 2010. Verified Purchase. Axe of Iron - Confrontation is an adventure that J. Hunsinger must have lived in his prior life. Either that or he is a master of research on tides, nautical maneuvers, religious beliefs, mores, mortal combat and ultimately a logical resolution in the conflict between the Northmen who have settled in North America and the Indian tribes. Hunsinger delivers a fast-moving educational adventure. It is a man's book, but for women who wonder what life with a Viking warrior would be like, they will not be disappointed.

I read the first Axe of Iron novel where the author set the stage for the initial settlement in North America. To enjoy the complete adventure, it was essential to start the story at the very beginning. Don't let the complicated names throw you. Just give them your own nickname. The characters speak for themselves through Hunsinger who must have sailed and fought with these warriors.

Confrontation is a page turner that keeps the action moving. When you complete the novel, you are anxious for the author to finish the next adventure. You will not be disappointed. Gerald S. Blaine

Review by jleepaez: 5.0 out of 5 Stars. Hunsinger's books are well written and provides a credible picture.

Reviewed in the United States on February 20, 2015. Verified Purchase. Hunsinger's books are well written and provides a credible picture of the history of the Viking's in America. It is a worthwhile book to read to understand the European beginnings into our part of the world.

Review by Tracy Roberts, Write Field Services: 5.0 out of 5 Stars. Confrontation: Axe of Iron.

Reviewed in the United States on March 30, 2010. 'Confrontation: An Axe of Iron Novel' is J.A. Hunsinger's second novel that is a continuation of his first Viking adventure, 'Axe of Iron,' that takes place in the year 1008.

Hunsinger continues the adventures of Norsemen explorers Halfdan Ingolfsson and his second in command, Gudbjartur Einarsson, who have led an expedition and established a settlement named Halfdansfjord, located along the coast of North America on the east coast of James Bay, at the south end of Hudson Bay.

The Viking adventures continue with the settlers struggling to make a life in Halfdansfjord. The focus of the adventure is the relationship between the settlers and the indigenous people. Readers will not only experience the lives of the Norsemen, but also the lives of the natives that include the Naskapi (Cree), Anishinabeg (Ojibwa), and the Haudenosaunee (Iroquois). The story delves into the confrontations with the natives. Readers will not only experience life and death confrontations, but also the relationships between the settlers and natives. When Gudbjartur is on a scouting trip, he is captured and becomes a prisoner of the Naskapi tribe, and is then taken to their village. Through his eyes, readers will learn about the native peoples' lives through a chronicling of their practices, customs, burial rituals, execution rituals, hunting methods, and cooking methods. Readers will experience how tough life is in the wilderness and the brutal conditions both the natives and Viking settlers endure.

Despite the harsh conditions and brutal confrontations, a major theme of the story is how the native and Norsemen learn about each other's way of life and the friendships and mutual respect that develop. For instance, Gudbjartur becomes a part of the tribe and learns from them. He reflects, "These warriors, I guess they are my warriors too. I have been accepted as one of them." As well, his son, Ivar Gudbjartarsson, also experiences life as a prisoner of the Haudenosaunee.

Hunsinger successfully builds on his first novel and adds even more action and adventure. As with the first novel, the story is rich in historical details which clearly show the careful attention paid to historical accuracy which allows the reader to peer through a window into the past and experience an important historical period. He incorporates the fictional tale with historical details which makes reading the story not only fun, but also engaging. Readers will root for Gudbjartur as he struggles with his Norsemen fighting spirit and his desire to make peace with the native people. I highly recommend 'Confrontation: An Axe of Iron Novel' as an entertaining addition to the historical fiction genre. Readers will find the story and characters so compelling that they will not realize that they are learning as they read.

Assimilation: An Axe of Iron Novel by J. A. Hunsinger

Third Book In An Axe of Iron Series.

Assimilation will wet the appetite of the fans that have developed a fascination with the plight of the Greenland Viking settlers in the first two novels of the series, *The Settlers* and *Confrontation*.

The twists and turns of this continuing tale will engage the reader from the outset as the tall, fair-skinned invaders, knowing it is their key to survival, gradually assimilate with the savage natives of the pre-historical land that will become the Hudson Bay and Great Lakes regions of Canada and the US.

In a scenario ordained by the gods, this assimilation process has a thin chance of success through the forced involvement of two of the Viking settlers with tribes of natives that are habitual enemies of one another. Against overwhelming odds that can have but one successful outcome for the settlers, daily life becomes a balancing act where one word, one gesture, one innocent mistake, can spell disaster in this hostile setting.

5 Stars: Assimilation is the final novel in the Axe of Iron series by J. A. Hunsinger. The author asks that you read or reread the 'Historical Perspective' that is located in 'The Settlers' which is the first volume in this series. The author's research into the historical time frame and authentic pre-historical Indian names is irrefutable. The 'Historical Perspective' goes into the whole concept of the Norse sagas. Even though each book stands alone, as a reader who has enjoyed the entire series, I encourage you to purchase all three books.

As the author states in his book's description, the first two books in this series (The Settlers and Confrontation) "dealt with the plight of the Greenland Viking settlers".

Assimilation begins with a map showing where the settlements are and opens with two Naskapi warriors hidden from view, surveying the river valley below. The saga continues with descriptive writing that puts you the reader on the ground experiencing the mysteries of the Viking period. Smell the earth and lush dense forests, travel the routes carved out of the land by natives and take up residence in the villages and experience the hardships of this pre-historical land that we now call the Hudson Bay and the Great Lakes of Canada and the US.

Eavesdrop on Nipishish and Ingerd as they lay in each other's arms, engaged in whispered conversation like couples do.

Join warriors in their canoes as they glide in the chill of pre-dawn morning heading toward the Haudenosaunee Village.

Stand at the rail of a Viking ship called Steed of the Sea and feel the motion of the sea as the ship heads towards a distant beach.

After the storm, the Norse society dries out and attends to the damage that Njord and Thor (the gods of weather) have forced upon them. Catch a glimpse of the smoke that curls into the calm skies over the cook fires where fish, meat and stew aroma awaits the barley bread and other leftovers that will nourish the community and reward the daily chores.

Reconnect with the characters that you have come to know like Halfdan, his dog Fang, Tostig, and experience the council meetings where men discuss their destiny, when in reality it is the gods like the "mighty Thor" who have the final say.

Strong women who cook and weave on looms by the light of seal oil lamps, teach their girls to spin fibers of wool into skeins of thread, care for the children and their men with tenderness in a world where both

beauty and harshness intertwine. Communities where communication and yes even gossip are the norm, and where the outsider might find rest if assimilation is acquired.

Drumbeats of war are as common as the moon rising over the snow, so too are the tracks of snowshoes where the trappers are as important as the warriors for a civilization that exists within a fine balance between preservation and extinction. Here is a quote: "Nipishish, Kejo, and Lothar returned to their village as quickly as possible after the parley with Nesatin. Word spread faster than normal through the Nitassinan that the Anishinabeg had rejected Sachem's peace offering regarding the people of Haldansfjord."

I invite you to read *Assimilation* and discover for yourself where the legend of the Death Wind came from and what it meant for the earliest American colonies. Enjoy the detailed glossary at the end of this book which will help you understand the authentic names and terms used in this book series.

Let me take this moment to thank Author J. A. Hunsinger for his time, research and engaging storytelling that has made *An Axe of Iron* series possible. I sincerely hope that he will continue to write as some storytellers have one story to tell, others have infinite stories that need to be told and preserved for generations to come. The *Axe of Iron* novels are one of those series that time will not forget.

Assimilation: An Axe of Iron Novel by J. A. Hunsinger is book three in the fictional historical accounting of exploration and settlement of Vinland (North America).

Editorial Review (Book Marketing Global Network).

Review by Kindle Customer: 5.0 out of 5 Stars. A fantastic book by an Author who researched and lived this Journey of the Nordics who journeyed from Greenland to settle in Canada. Reviewed in the United States on December 17, 2016. Verified Purchase. I am a friend of the author. Since he was born, he was compelled to write this trilogy describing an ill-fated journey from Greenland to Canada by the Nordic Vikings to settle in the new world. The settlement was in a land ideally fitted to the Vikings; however, it was heavily populated by three nomadic Indian tribes.

The story is about the assimilation of the Vikings into the society of nomads and the fate of the Vikings. The novel was thoroughly researched and the findings leave no doubt to the reader that the historically accurate tales about blond headed warriors were members of the Indian tribe.

Jerry stuck with accuracy as it relates to the Indian tribal names and the Nordics that settled in the new world. It took a while to adjust to the names and nomenclature, however this quickly makes the reader a party to the natives and Vikings who lived and died in this adventure. Jerry is an excellent descriptive writer who verbally takes the reader through the many adventures that occurred during this adventure.

I had a tough time laying the novels down, then I spent a great deal of time reflecting on the potential real life type of this adventure and its reality to history. An excellent trilogy. By Gerald Blaine.

Review by Unknown: 5.0 out of 5 Stars. A Fantastic Read. Reviewed in the United States on December 13, 2016. Verified Purchase. I have read all three novels of The Axe of Iron: The Settlers, Confrontation, and Assimilation. I am in constant awe of the skills of this author. I consider these three books among the best novels I have ever read. The skill, passion, and knowledge that Mr. Hunsinger writes with in this historical fiction is fantastic! I could hardly put them down. Each book carries with it love, anger, passion, fierce fighting, and romance, and it never seems to stop. Hunsinger cost me a lot of lost sleep reading into the wee hours of the night. I hope he treats us with many more exciting novels like these. Review by J.D.Colfer.

Review by Martin Chazen: 5.0 out of 5 Stars. A Must Read For Axe of Iron Followers! Reviewed in the United States on October 7, 2016. Verified Purchase. After reading The Settlers and Confrontation, I never really left the families of these books, neither the Native Americans nor the Norse. I often thought of them and what else might have happened to them. With the third book, Assimilation, these questions have been answered. The postulations were thoroughly researched and are entirely plausible. It made for a great story that was always interesting and very personal. I am happy to recommend it for the story as well as for the historical detail of the North American culture. It is a great read and a real page-turner!

Review by Tracy Roberts, Write Field Services: 5.0 out of 5 Stars. An Exciting Adventure. Reviewed in the United States on October 28, 2016. 'Assimilation: An Axe of Iron Novel' is J.A. Hunsinger's third and final novel in his 'Axe of Iron' novel series about the Norse people and their adventures as settlers in the new world. The Viking tale takes place about 1000 years ago in the settlement of Halfdansfjord and surrounding areas, located along the coast of North America on the east coast of James Bay, at the south end of Hudson Bay.

Hunsinger continues with the adventures of Norsemen explorers Halfdan Ingolfsson and Gudbjartur Einarsson, and their families, as well as the native tribes the Naskapi (Cree), Anishinabeg (Ojibwa), and the Haudenosaunee (Iroquois). As historical fiction, 'Assimilation' presents a possible scenario about what may have happened to the Norse people and their settlements during this period.

'Assimilation' delivers a more in-depth story of the native tribes and their impact on the Norse people and their settlements. Readers experience the conflicts, relationships, and integration of the settlers and the native peoples. Gudbjartur, once a prisoner of the Naskapi tribe, has forged an important friendship with them while living among them and adhering to their customs and practices. He goes by the name of Nipishish, meaning Axeman. Halfdan is the Chieftain of the Norse settlement, Halfdansfjord, where he is tasked with overseeing life at the settlement and trying to thwart an impending threat to the settlers and the settlement itself.

Friendships develop between settlers and Naskapi and some of the native tribes fully accept the Norse people. There is an integration of the Norse people with these tribes, particularly settlers like Gudbjartur and Ingerd's son, Ivar Gudbjartarsson, who chose to stay with his adopted Haudenosaunee parents rather than return to his own Norse people. Readers experience native life, including their customs, rituals, practices, hunting methods, cooking methods, battle tactics, and how the Norse living among them adapted.

Along with forged friendships with the Naskapi and changing and adapting to new circumstances, the major conflict in the story which presents a possible scenario about what may have happened to the Norse people, is the Anishinabeg tribe's declaration of War with the settlers and their determination to destroy Halfdansfjord.

Hunsinger presents an adventure rich in historical detail, with careful attention paid to customs and practices of both the Norse settlers and the Native tribes. The struggles and threats to the Norse people highlight the difficulties of maintaining a settlement. The impact of loss is a major theme as well as obsessive, brutal revenge that destroys one's humanity as the result of a traumatic loss. Hunsinger delivers a tale filled with action and adventure giving readers a fascinating look at life of the Norse and native tribes about 1000 years ago. 'Assimilation: An Axe of Iron Novel' is well worth reading, particularly for those who love historical fiction.

About J. A. Hunsinger: J. A. Hunsinger is an Author, Publisher, Amateur Archaeologist and Historian. His 'Axe of Iron' Series Details The Settlement Of A Large Group Of Norsemen On The North American Continent Beginning In 1008 AD.

J. A. Hunsinger's Books Include Axe Of Iron: 'The Settlers', 'Confrontation' and 'Assimilation'.

J. A. Hunsinger lives in Colorado, USA, with his wife Phyllis. He writes and promotes full-time. His three-book trilogy 'Axe of Iron' are available on Amazon.

Although he has long been a writer, much of his adult life has been associated with commercial aviation, both in and out of the cockpit. As an Engineering Technical Writer for Honeywell Commercial Flight Systems Group, Phoenix, AZ, he authored two comprehensive pilots' manuals on aircraft computer guidance systems and several supplemental aircraft radar manuals. His manuals have been published and distributed worldwide to airline operators by Honeywell Engineering, Phoenix, AZ. His first published work for the general public, Flight Into Danger, appeared in Flying Magazine, (August 2002). Many of his articles have been featured in other periodicals and websites or are featured on his blog.

After his flying career ended on his 60th birthday, he found himself with time to continue his writing; this first novel was actually begun more than twenty years ago. He attended many writing classes and seminars, but couldn't sustain a head of steam as a writer. All of that changed abruptly in 2004, when he remarried. Phyllis provided the necessary push and as a result he treated writing as work, which it most certainly is.

Writing is a learned craft. In order to learn to write, you must write. Eventually the classes must be set aside; set a daily work schedule and stick to it. That is not to say you should stop taking classes altogether; learning is a lifetime experience. Sooner or later though, you must take the plunge and go at it on your own.

Have a story to tell, one that you like. Then sit down and get busy. Have your work professionally edited: rewrite, edit, rewrite, until you've gotten it as good as it can be.

That's all there is to being a writer.
